

Product Specifications & Technical Details

Token2 - security is easy

Product Details

Leather Case for Token2 Dual Interface FIDO2 Security Keys

Protect your key while keeping it fully usable.

We do not recommend attaching the Token2 key directly to a keyring, as the body is made of plastic and may wear or break over time. This custom-fit leather case adds a layer of protection and durability, making it easier and safer to carry your key every day.

- Designed for **Token2 Dual Interface FIDO2 keys** (USB-A & USB-C)
- **Expose either USB-A or USB-C** depending on your preference
- **Touch sensor accessible** – use the key without removing it
- **Snap button** and **keyring loop** for convenient everyday use
- Made from stitched black leather with a simple, functional design

⚠ Not compatible with USB-C-only or USB-A-only Token2 models.
Does not support dual-interface biometric keys.
