Obtaining the seeds/secrets/CSV files for TOTP tokens

The process of requesting factory-set seeds for Token2 hardware tokens is described [here](#).

Independent Compliance Check

RFC6238 compliance confirmed by CertX, the first swiss accredited certification body for product certification in the scope of industrial cybersecurity and functional safety.

[TOKEN2 C202 TOTP hardware token - Independent Compliance Check report by CertX](#)

Please note that the “5-pack” option for this product is offered purely as a discount term. The items are not specially packaged as a 5-pack; they are packed and shipped in the standard way. For orders of more than 3 units, the products will be grouped and shipped in plastic trays for easier handling.

Time drift and other parameters

This is a classic TOTP token with factory-set seeds. Parameters such as the hash algorithm (SHA-1 or SHA-256), seeds, or internal clock cannot be changed. It can only be used with systems that allow seed import and implement [RFC-compliant time drift compensation](#).
